Attorney General John Ashcroft
US Dept of Justice
950 Pennsylvania Ave, NW
Washington, DC 20530

Dear Mr. Ashcroft,

I am writing to give my support to the agreement reached between Microsoft and the Dept of Justice. I did not support the original lawsuit against Microsoft.

I do not think the case was warranted. The lawsuit was more political than any outrage over unethical business dealings. Bill Gates has carried the technological revolution on his shoulders. He has enabled the average person to become part of the technological ago. Does anyone remember what it was like before Microsoft? Bill Gates standardized computer software to enable its compatibility with other software. And people bought the product, because it was the best and it still is.

Bill Gates has agreed to any number of terms demanded from the Dept of Justice. Microsoft has agreed to share its source codes and books pertaining to Windows, that Windows use to communicate with other programs; Microsoft has agreed to a three person technical committee to monitor future compliance; Microsoft has agreed to contractual restrictions and intellectual property right.

This is more than fair.

Give your approval to this agreement. Allow us to get back to work. Honestly, I do not agree government intervention on technology and its innovation. it only serves as a hindrance. Microsoft's dominance on computer and technology is due to superiority of its products and its marketing skills.

Sincerely,

Marc Hui
